### SEMESTER-VI ADMINISTRATIVE LAW

**Course Code: BAL604**

**Maximum Marks: 100**

**L-T-P: 3-1-0**

**Course Type: Core**

---

#### **Course Background:**

Administrative Law is the law relating to administration. It includes the structure, powers and functions of the organs of administration, the limits of their powers, the methods and procedures followed by them in exercising their powers and functions, the methods by which their powers are controlled including the legal remedies available to a person against them when his rights are infringed by their operation. However it is extremely difficult to define administrative law and it includes all the facets because it changes according to the social, economic and political changes. It is only in the twentieth century that administrative law developed as a separate branch of legal discipline. This is due to the changing role of the state from *laissez faire* to a welfare state. The expansion in the functions of the state and enormous powers of the administration has given tremendous capacity to the administration to affect the rights and liberties of the individual. Therefore it has become important to control the administration in order to ensure that the governmental functions are exercised according to law and protection is provided to the individual against abuse of such power. Thus there arises the need for adjusting the relationship between the government and the governed so that a proper balance may be evolved between the private interest and public interest and rule of law is maintained. This course is designed to give some insight into the body of administrative law in India.
